

Naurak Hyttefelt Veilag

Road standard:

One of main tasks for the Veilag is to ensure that the road holding a satisfactory standard, and it is up to the annual meeting (all members) to define what constitutes a satisfactory standard. The cost is clearly dependence of the standard and it is important that we balance this. Articles of Association § 6 also says something about the volunteers as a means to keep costs down.

To ensure that each member shall have the opportunity to contribute their own efforts, the Board of Naurak Hyttefelt Veilag have decided to set some rules for the allocation and implementation of their own efforts.

Area:

Each cottage (groups of huts) are assigned to a distance range of the road that they are required to maintain.

It is then up to the individual groups to agree on division of labor and time for implementation of their own efforts. Note that it is entitled to the time period for implementation of some activities.

Snow Sticks:

Snow sticks stored in the lower pump hous at field 6. After collection, they shall be brought back to the pump house.

Deployment of snow sticking to take place in the period 15 September - 15 October. They should be placed in about 50 meters distance between each other and applied alternately (not parallel).

Collection of snow sticking to take place in the period 15 April (or as soon as the frost has passed) - 5 May.

Sand Boxes:

Replenishment of sand in the sandbox that belong to the area you are assigned. Chairman of the Veilag to be contacted for access to sand.

Roadsides / ditches:

To hold down the growth of all vegetation along roadsides and to keep ditches and culvert free from all that prevents free water-stream in the area you are assigned.

This is carried out annually and culvert checked regularly.
